The screenshot shows a travel route planning interface. At the top, there are icons for different modes of transport: bus (selected), car, bicycle, pedestrian, and plane. Below these are travel times: Optimo (12 h), 12 h 5..., 11 días, and 3 días. The main area displays two routes from Paris to Madrid. The first route, starting at Gare Montparnasse, is 12 h 58 min long and involves a train (OUIGO GV) to Bordeaux Paludate, followed by a bus (FlixBus) to Madrid Barajas Adolfo Suarez Airport. The second route, starting at Gare Montparnasse, is 13 h 31 min long and involves a train (TGV INOUI) to Bordeaux Paludate, followed by a bus (FlixBus) to Madrid Barajas Adolfo Suarez Airport. Both routes also include a 13-minute walk (pedestrian icon). The interface includes a sidebar with recent locations (Paris, Madrid) and a bottom navigation bar with links to National, Argentina, Condiciones, Privacidad, and Enviar comentarios sobre el producto.
